

## **Intranet development**

<b>The Client</b>
The customer is a leading securities firm with global operations.
<b>The Challenge</b>
To formulate a strategy to design and develop an intranet allowing 12,000 users to find information easily through horizontal mining based on tasks.
<b>The Solution</b>
Our team delivered a comprehensive solution for site design, management and information management. The intranet provided functionalities for 30 departments to create, convert, test and publish information.
<b>The Benefits</b>
The team delivered a comprehensive intranet to disseminate information quickly and provide access to various applications within the organization.
<b>The Technology</b>
