

## Redesign of web portal

### The Client

The customer is large CRM solutions provider, with worldwide distribution outlets servicing North and South America, Europe and Asia Pacific.

### The Challenge

Re-designing a web portal with enhancements and developing browser specific code to support the oldest and the latest versions of Internet Explorer, Netscape and Mozilla browsers.

### The Solution

Our team reengineered the web portal to match the requirements of the customer. The solution was delivered on time, with a majority of the development done at the offshore development center in India.

### The Benefits

The customer benefited from a reduction in the cost of development since the project was executed from the offshore development center in India.

### The Technology
