

Virtualization Assessment and Implementation

The Challenge

The objective of this project was to simplify the PCI compliance process for any organization that accepts credit card.

The Solution

simplyPCI, powered by Mindteck, solutions focused on simplifying the PCI compliance process for any organization that accepts credit cards. Mindteck experts were involved in conducting an assessment to implementing the VMware solution for PCI product. The solution included Virtualization Assessment, Architecture and Design, Capacity Planning, Infrastructure Build and Testing and VM Ware Installation. Mindteck leveraged the Global Delivery Model to set up an onsite/offshore team to execute the project and provide a cost effective solution to the client.

The Benefits

Mindteck team lowered Total Cost of Ownership by significantly lowering the number of physical servers. It provided easier management and operations and improved reliability and quality of service.

The Technology

- System Monitoring Tools
- Application and Database
- Backup and Recovery
- Project Management Tools
- Systems Monitoring tools
