

FOR IMMEDIATE RELEASE

MINDTECK ESTABLISHES FOOTPRINT IN NEW ENGLAND

Pivotal role for two local IT business professionals

Harrisburg, PA / May 17, 2012: Mindteck, a global product engineering and IT solutions company, has appointed two native Massachusetts professionals to lead the company's expansion into the New England region in support of its US growth strategy. The company's present US footprint, along with its Enola, Pennsylvania headquarters, encompasses New Jersey, Illinois, Colorado, California, and a Professional Services roster of over 250 employees covering 38 states.

Messrs. Phillip Smoller, from Everett, and Michael Pavetto, from Salem, have become Business Development Managers, New England, and will focus on expanding and supporting the company's rapid growth in Managed Services and Professional Services, respectively.

Mr. Smoller brings multiple past successes at helping companies implement enterprise software and engineering solutions to his new role in Managed Services. His focus will be in the Life Sciences vertical, helping companies that design, develop and manufacture medical devices and analytical equipment exceed target release dates. Prior to joining Mindteck, Mr. Smoller spent three years at Boston Engineering Corporation where he was responsible for driving training and software revenue for channels and mid-market accounts in New England. Most notably, he demonstrated hands-on profit growth success by closing several six-figure IT and engineering consulting deals during his tenure. While at Insight Global earlier in his career, he prospected and secured IT professionals for the company's top accounts.

Mr. Smoller, who is proud to have grown up on the Cape in Chatham, enjoys fishing, water sports, playing hockey and golf, and spending time with family and friends. He holds a B.B.A. in Business Management from the Isenberg School of Management – University of Massachusetts at Amherst.

Mr. Pavetto has considerable technical field sales expertise to bring to bear for his Professional Services role at Mindteck. Until recently, he was a field sales representative at Illume Software, Inc. in Needham where, along with serving customers and overseeing channel partnerships, he managed a major General Services Administration reseller relationship. Earlier, as an applications sales representative at Oracle, he sold the company's flagship ERP solutions in the New England and Upstate New York territory. During a two-year plus stint at Parametric Technology Corporation, he was responsible for all West Coast inside sales, covering federal and high-tech verticals, and he earned multiple awards for his contributions for both client and sales growth. Mr. Pavetto's career started as a sales representative – project manager for BAW Plastics where he grew client relationships and introduced a project management approach to the sales organization.

Mr. Pavetto holds a B.A. in Communications, with a minor in Economics, from the University of Pittsburgh, where he was also a diver on the varsity team. He is married and has two sons.

Mindteck's CEO and Managing Director, Mr. Wayne Berkowitz, commented, "We're delighted to welcome both Phil and Mike. They are a valuable addition to our growing team as we expand our global reach locally to help leverage our momentum. Increasingly, more and more companies are finding they need our 20-plus years of specialized technology knowledge and expertise, along with the skilled IT resources that have become so difficult to secure. Phil and Mike's energy, and experience in relationship building, are crucial to fulfilling these needs."

Phillip Smoller Michael Pavetto
